INTRODUCING...

IPLS Community Platform

The IPLS Community Platform (ICP) is an exciting new membership benefit brought to you by the team at the IPLS

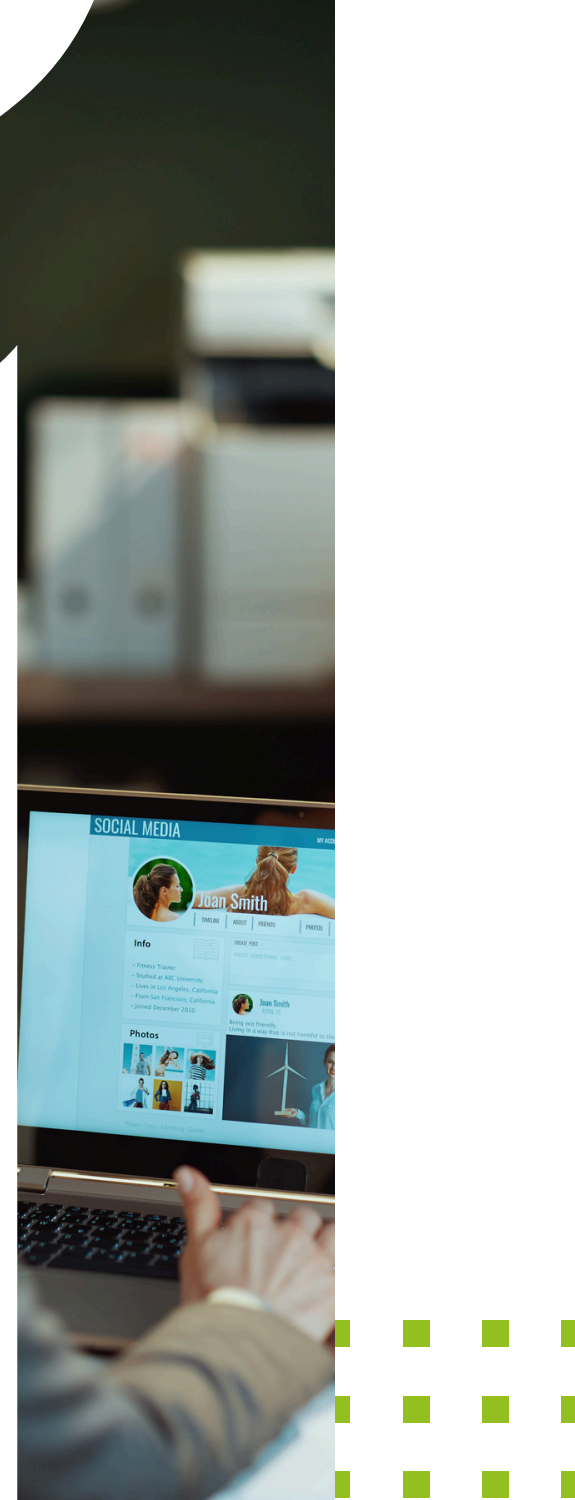

The ICP is a bespoke communication platform to enhance co-operation between member groups but also to assist you with your day to day business.

This replaces the current IPLS membership database.

YOUR INDIVIDUAL PROFILE

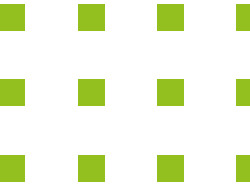

You decide what you would like to share with other members.

Your profile is bespoke and can be edited by you at any time.

It also includes an option to upload collateral/files you would like to share:

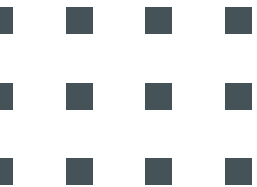

- Corporate presentations
- Opportunity documentation
- Non confidential summaries

As you know connectivity is key in business development.

The ICP allows you to form connections with fellow members and formalise direct communication, again purely at your discretion.

A follow feature also allows you to follow other members and be informed if they post content on the platform.

CONNECT WITH OTHER MEMBERS

MESSAGE MEMBERS

This messaging function allows direct communication with your contacts, or members you have requested to message.

The IPLS and National groups will post information on events, training courses, reports, data etc.

For the first time you will be able to see at a glance all that is available across our wide IPLS network and choose whether to engage, attend or register.

You can also post information yourself, which will be visible to your contacts and people following you.

NEWS FEED

DISCUSSION FORUM

Is a place you can ask general questions to the network, similarly you can, if you wish post answers to help fellow members.

This is likely to become an active discussion forum on all sorts of relevant topics across life science partnering.

PRIVATE NETWORK

The ICP is secure and private. Only current members of IPLS groups have access, and no external organisations can see or follow any activity on the platform.

ADMINISTRATION

Each country group will have an appointed admin contact who will maintain the accuracy of the membership and post to the newsfeed.

ACCESS & LAUNCH

The UK PLG and Swiss HLG will be pioneers in adopting the ICP and other groups will come on board over the summer.

The official launch will be at the IPLS conference on September 16-18 in Malaga. We hope to celebrate the launch with you there!

You will receive by email an initial temporary login which you can customise and start to build your profile and interact with the IPLS network.
